

RM of East St Paul Emergency Measures Organization

Prepare At Home

Emergency preparedness is initially a personal responsibility. While municipal governments have resources available to assist as an emergency escalates, individuals are expected to have made plans and take steps to secure the safety of themselves, their families, and any other responsibilities.

Some basic measures to prepare your home for an emergency include keeping a supply of food, water and medication to last for at least a 72 hour period, along with some basic necessities like a radio, flashlight, and toiletries. The following brochures describe how to prepare your home for an emergency and how to make an emergency kit. View or print these brochures from the [Brochures and Downloads](#) page:
